SECV2113 HUMAN COMPUTER INTERACTION

LECTURER: DR. NUR ZURAIFAH SYAZRAH BINTI OTHMAN

NAME	MATRIC NUMBER
DAYANG FARAH FARZANA BINTI ABANG IDHAM	A23CS0071
FARRA NURZAHIN BINTI ZAHARIL ANUAR	A23CS0079
HARINI A/P SANGARAN	A23CS0081
SAFIYA NURSYAHADAH BINTI MASNOOR	A23CS0176

INTRODUCTION

We evaluated the prototype of Group Ais Tak Kosong, which was created using the Figma application. The prototype was evaluated using heuristic evaluations by applying Nielsen's heuristics. Then, the user interfaces were also rated by severity level based on the observation while interacting with the prototype.

The 10 rules of Nielsen's heuristics are :

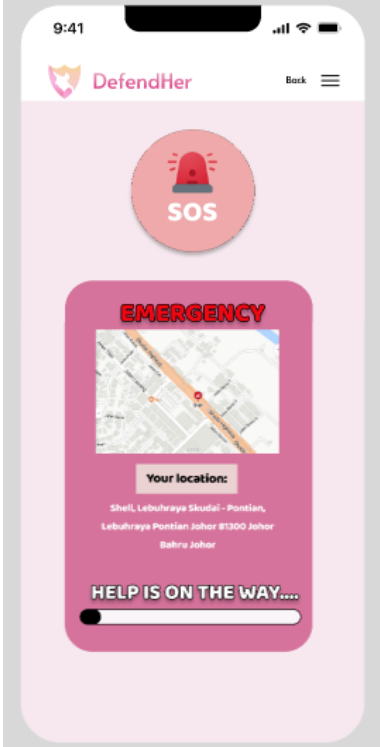

1. Visibility of system status.
2. Match between system and real world.
3. User control and freedom.
4. Consistency and standards.
5. Error prevention.
6. Recognition rather than recall.
7. Flexibility and efficiency of use.
8. Aesthetic and minimalist design.
9. Help users recognize, diagnose, and recover from errors.
10. Help and documentation.

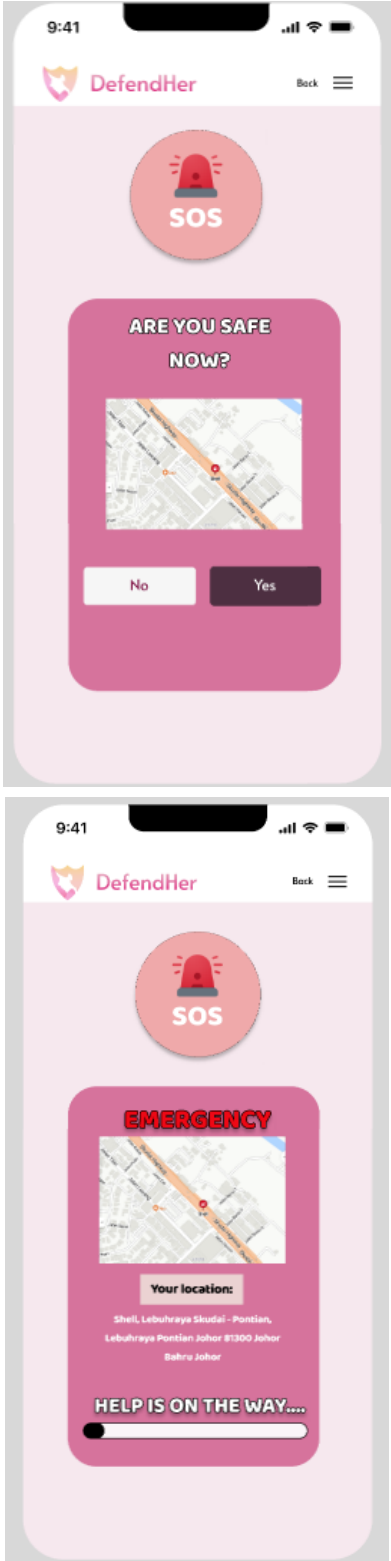

The severity ratings are :

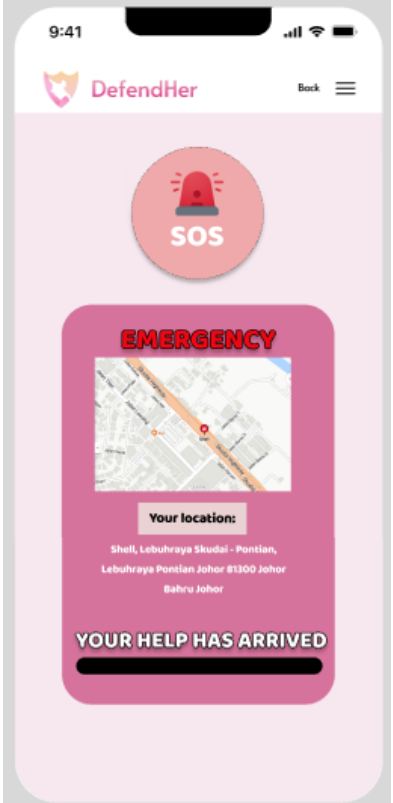

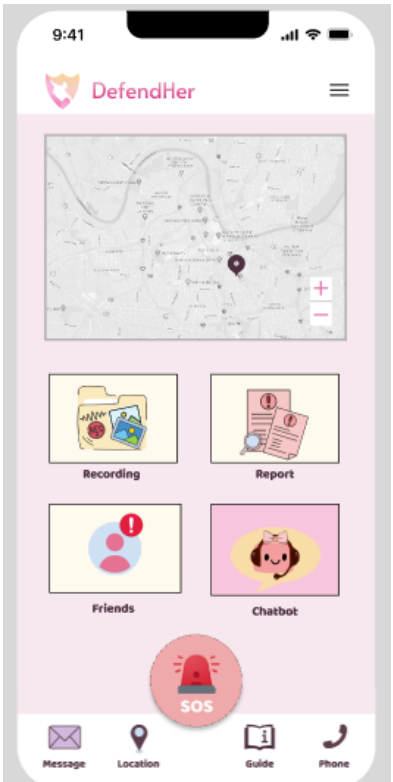

1. Cosmetic issue – affects the appearance and should be fixed only if time permits
2. Minor issue – hinders the user's ability to navigate and should be fixed when possible
3. Major issue – Frustrates or confuses users and requires repair as soon as possible
4. Catastrophic issue – prohibits users from performing their given task and requires an immediate modification

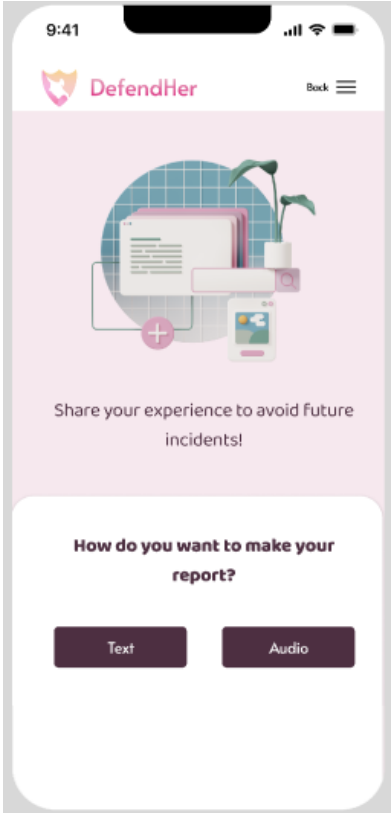

We evaluated the prototype as Syafiqah, a high school student who relies on a safety application while commuting to and from school. The application DefendHer, includes SOS feature, has voice recognition and data recording feature. Thus, we tested those three features.

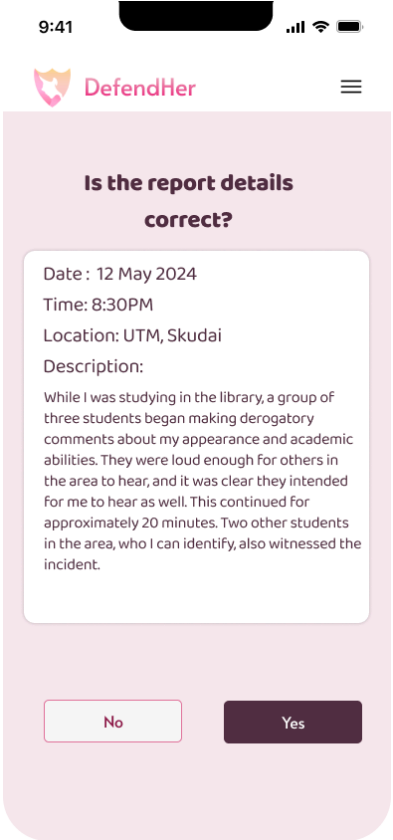

HEURISTIC EVALUATION RESULTS

Num	Prototype image	Identified issue	Heuristic and Severity
1		The application does not provide the option to modify the address, just in case the address displayed is wrong.	H3 : User control and freedom S2 : Minor issue

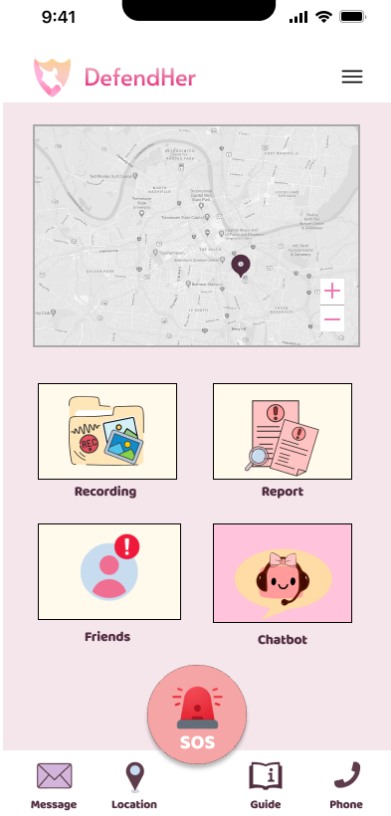

2	 The image displays two screenshots of the DefendHer mobile application interface. Both screens feature a pink background and a top navigation bar with the 'DefendHer' logo and a 'Back' button. A red circular 'SOS' button is positioned at the top of each screen. The top screenshot shows a pink rounded rectangle containing the text 'ARE YOU SAFE NOW?' above a map. Below the map are two buttons: 'No' and 'Yes'. The bottom screenshot shows a similar layout but with the text 'EMERGENCY' in red above the map. Below the map, it displays 'Your location:' followed by the address 'Shell, Lebuh raya Skudai - Pontian, Lebuh raya Pontian Johor 81300 Johor Bahru Johor'. At the bottom of this section, it says 'HELP IS ON THE WAY....' with a progress bar.	When the option “No” is clicked for the question “Are you safe now?”, the application doesn’t ask the user for the type of emergency or type of help needed but sends more help only which might not be useful.	H5 : Error prevention S3 : Major issue
---	---	--	---

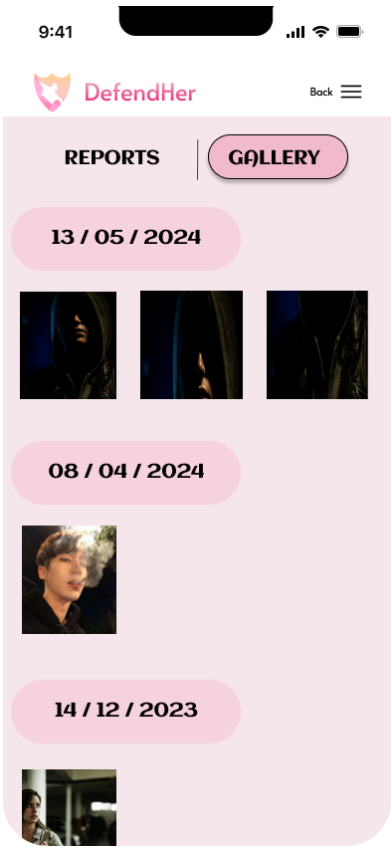

3		The application does not specify what type of help is provided. Thus, it is hard for the users to identify the help that is sent.	H1 : Visibility of system status S2 : Minor issue
4		There is no pop up when options “Friends” and “Chatbot” are clicked.	H8 : Aesthetic and minimalist design S3 : Major issue

5		There is no pop up when the option “Text”is clicked.	H5 : Error prevention S3 : Major issue
---	--	---	--

6	 9:41 DefendHer Is the report details correct? Date : 12 May 2024 Time: 8:30PM Location: UTM, Skudai Description: While I was studying in the library, a group of three students began making derogatory comments about my appearance and academic abilities. They were loud enough for others in the area to hear, and it was clear they intended for me to hear as well. This continued for approximately 20 minutes. Two other students in the area, who I can identify, also witnessed the incident. No Yes	This page lacks shortcuts for users to access some of the report parts. For example, instead of the user only needing to re-do the 'location' part, they need to re-do all of the steps to complete the reporting.	H7: Flexibility and efficiency use S2: Minor issue
---	---	---	--

7	9:41 DefendHer Back Reports 12 May 2024 , 8:30 PM UTM, Skudai While I was studying in the library, a group of three students began making derogatory comments about my appearance and academic abilities. They were loud. 4 April 2024 , 2:15 PM Menara A, Taman Sri Pulai Today, I was subjected to an unfortunate incident of harassment. The incident occurred at approximately 2:00 PM in the main office area. The individual involved is a 15 January 2024 , 7:55 PM Restoran Ali, Taman Desa Bakti The staff member approached me while I was at my table and began making inappropriate comments that were personal and offensive. Despite my attempts to express my 21 October 2023 , 10:00 PM Jalan Cempaka The individual approached me while I was walking through the alleyway and began making threatening and offensive remarks. Despite my attempts to leave the area quickly, the Create a Report	The screens do not display any clear options for users to recover from errors. The user cannot undo or edit the report if they noticed mistakes after they submit the report.	H9: Help users recognize, diagnose, recover from errors. S3: Major issue
---	--	--	--

8		'Guide' option on this page does not work when clicking means that there is no help and documentation provided for new users to use.	H10: Help and documentation S3: Major issue
---	--	---	--

9		Three lines on the upper right of the page have the same function as the 'back' button.	H1: Visibility of system status S1: Cosmetic issue
---	--	--	--
